

# NURTEN DEMİR

JUNIOR FULLSTACK  
DEVELOPER

## PROFILE

Junior Software Developer with a focused interest in web development, currently enhancing front-end development skills through consistent practice and applied learning. Experienced in creating basic web page structures, styling user interfaces, and implementing interactive elements using HTML, CSS, and JavaScript. Actively preparing for a software development internship by advancing technical proficiency and problem-solving capabilities.

## PROJECTS

### ■ TECHEDU PLATFORM

- Developing an educational platform by progressively integrating full-stack concepts.
- Applying newly learned front-end and back-end knowledge into the project.

### ■ Web Data Automation & Comparison

- Automated data extraction from e-commerce websites using Selenium.
- Compared product data and exported results to Excel.

### ■ YouTube Data Collection

- Automated extraction of YouTube search results using Selenium.
- Stored collected video data in Excel files.

### ■ Google Scholar Data Extraction

- Collected author data from Google Scholar using the Scholarly library.
- Exported structured academic data to Excel.

### ■ Python Mini Projects

- Developed small Python scripts to practice programming fundamentals

### ■ HTML & CSS Practice Projects

- Developed multiple static web pages using HTML and CSS, focusing on layout and semantic structure.
